

IN THE CLAIMS:

1-11. (Canceled).

12. (New) A collapsible structure comprising:

a first panel and a second panel, each panel having a foldable frame member having a folded and an unfolded orientation, with a fabric material covering part or all of the frame member to form a flat panel when the frame member is in the unfolded orientation, each panel being collapsed to a smaller size by twisting and folding its respective frame member, the second panel further including a side;

wherein the second panel extends at an angle from a horizontal surface, with the first panel extending vertically from the horizontal surface; and

means for maintaining the second panel at the angle.

13. (New) The structure of claim 12, wherein the side of the second panel is hingedly coupled to the fabric of the first panel.

14. (New) The structure of claim 12, further including a third panel having a foldable frame member having a folded and an unfolded orientation, with a fabric material part or all of the frame member of the third panel to form a flat panel when the frame member of the third panel is in the unfolded orientation, with the third panel further including a side, and the first panel further including a side, wherein the side of the third panel is coupled to the side of the first panel.

15. (New) The structure of claim 12, further including an amusement feature provided on the fabric of the first panel.

16. (New) The structure of claim 12, further including an amusement feature provided on the fabric of the second panel.
